

30 July 2013

PRESS RELEASE

EURO AREA ECONOMIC AND FINANCIAL DEVELOPMENTS BY INSTITUTIONAL SECTOR — FIRST QUARTER 2013

In the first quarter of 2013 the annual growth rate¹ of <u>household</u> gross disposable income turned positive (0.4%), after negative growth (-0.6%) in the fourth quarter of 2012 (see Table 2). The annual growth rate of household consumption expenditure was -0.2% in the first quarter, compared with 0.4% in the fourth quarter. Reflecting these developments, the annual growth rate of household gross saving increased to 5.1% in the first quarter, from -7.3% in the fourth quarter. The household gross saving rate² was 12.8% in the first quarter of 2013, compared with 13.1% in the first quarter of 2012.

The annual growth rate of household **financing** decreased to 0.4% from 0.9% in the fourth quarter, while that of **financial investment** was broadly unchanged at 1.7% (fourth quarter: 1.8%). Household **net worth**³ decreased (annual growth rate -0.5%) after increasing (0.4%) in the previous quarter.

The annual growth rate of **net entrepreneurial income** of **non-financial corporations** increased to -1.2% in the first quarter of 2013, from -2.8% in the previous quarter (see Table 3). The annual growth rate of **gross fixed capital formation** of non-financial corporations decreased to -7.8%, from -4.4% in the fourth quarter of 2012. The annual growth rate of **financing** of non-financial corporations was unchanged, at 1.0% from the previous quarter. Non-financial corporations' **financial investment** grew at an increased annual rate of 1.7% (fourth quarter 2012: 1.5%).

¹ The euro area accounts are expressed in current prices and are not seasonally adjusted. The growth rates are presented as year-on-year percentage changes (see the notes).

² The household saving rate is based on four-quarter cumulated sums of both saving and gross disposable income (adjusted for the change in the net equity of households in pension fund reserves).

³ Households' net worth consists of net financial assets and non-financial assets. Non-financial assets consist mainly of housing wealth (residential structures and land). They also include non-financial assets of unincorporated enterprises classified within the household sector.

Debt of households and non-financial corporations as a percentage of GDP stood at 65.1% (first quarter 2012: 65.4) and 102.8%, (first quarter 2012: 102.4) respectively (see Tables 2 and 3).⁴

Total euro area economy

Euro area net disposable income increased at an annual rate of 0.2% in the first quarter of 2013, compared with 1.3% in the fourth quarter of 2012 (see Chart 1 and Table 1). The annual growth rate of euro area **gross fixed capital formation** decreased to -6.7% (fourth quarter: -4.3%), owing to negative contributions from all non-financial sectors (see Chart 2). The growth rate of **gross capital formation** decreased to -7.1% in the first quarter, from -4.7% in the fourth (see Chart 3). The continued decline in gross capital formation accompanied by broadly unchanged euro area savings led to a continued growth of net lending by the euro area to the rest of the world (corresponding to an increase in the current and capital account surplus).

Households

The annual growth rate of household **gross disposable income i**ncreased to 0.4% in the first quarter of 2013, from -0.6% in the fourth quarter of 2012. This resulted mainly from an increase in the compensation of employees and the gross operating surplus and mixed income, which was only partly offset by the negative effect of increasing taxes (see Chart 4 and Table 2).

The annual growth rate of household **consumption expenditure** decreased to -0.2% in the first quarter, from 0.4% in the fourth quarter, while that of household gross saving increased to 5.1% from -7.3%. The household **gross saving rate**² was 12.8% in the first quarter of 2013, compared to 13.1% in the first quarter of 2012. The annual growth rate of gross fixed capital formation of households was -5.5% in the first quarter (fourth quarter 2012: -3.2%).

The annual growth rate of household **gross non-financial investment** was -5.2% in the first quarter of 2013, compared with -4.0% in the fourth quarter (see Chart 5), while the growth of **financial investment** was broadly unchanged at 1.7% (fourth quarter 2012: 1.8%). The decline in total investment and the increase in gross savings led to a decreased need for financing. The annual growth rate of financing of households decreased to 0.4% in the first quarter (from 0.9%), while the rate of loan financing was broadly unchanged at 0.1% (fourth quarter 2012: 0.2%) (see Table 2).

⁴ The sum of the debt of the household sector and of the non-financial corporation sector (also referred to as "Private debt"), based on annual financial accounts data, as a percentage of GDP is one of the headline indicators of the macroeconomic imbalance procedure of the European Commission. For non-financial corporations the definitions of debt used by the European Commission and the ECB differ slightly in terms of financial instruments (financial derivatives are excluded and pension fund reserve liabilities are included in the definition used by the ECB in its quarterly releases). In both cases, trade credits are not included (see Table 3).

Turning to the components of **household financial investment**, the annual growth rate of holdings of currency and deposits was broadly unchanged at 3.4% (fourth quarter: 3.5%). The annual growth rate of investment in debt securities was -10.1%, down from -7.1% in the fourth quarter, and that of investment in shares and other equity was broadly unchanged at 1.5% (1.4%.) The annual growth rate of households' additions to life insurance and pension fund reserves increased to 2.5% (from 2.2%).

Developments in **household balance sheets** reflected negative valuation changes of non-financial assets. In particular **housing wealth** declined at a faster rate (-4.0%, after -3.1% previously) (see Chart 6 and Table 2). This was only partly offset by positive changes in the valuation of financial assets. The annual growth rate of the market value of household holdings of shares and other equity decreased to 8.9% from 10.4% in the fourth quarter. **Household net worth** decreased (-0.5%) after increasing (0.4%) in the previous quarter (see Chart 6). The **household debt ratio**, defined here as the outstanding amount of loans as percentage of household gross disposable income, decreased to 98.1% in the first quarter of 2012 (as a percentage of GDP, debt decreased to 65.1% from 65.5%, see Table 2).

Non-financial corporations

Net entrepreneurial income⁵ of non-financial corporations decreased at a slower annual rate (-1.2%) than in the previous quarter (-2.8%) (see Chart 7 and Table 3). Net value added decreased at a faster annual rate (-0.8%, after -0.1%). The annual growth rate of **gross fixed capital formation** declined to -7.8% in the first quarter of 2013, from -4.4% in the previous quarter. The annual growth rate of **total gross non-financial investment**, which includes inventories, increased to -7.1% from -7.3% (see Chart 8). **Net lending (+)/net borrowing (-)** of non-financial corporations as a percentage of gross value added increased to 0.2% in the first quarter of 2013, from -1.2% in the first quarter of 2012 (see Table 3).

The annual growth rate of **financing** of non-financial corporations was unchanged at 1.0% in the first quarter of 2013. The annual growth rate of non-financial corporations' loan financing decreased to -0.1%, from 0.2% in the previous quarter. The annual growth rate of equity financing, via the issuance of quoted and unquoted shares and other equity, decreased to 1.1% (fourth quarter: 1.4%). The growth of the issuance of debt securities decreased to 10.9% (fourth quarter: 13.0%). The **non-financial corporation debt ratio**, defined here as the outstanding amount of loans, debt securities and pension fund reserve liabilities as a percentage of GDP, increased to 102.8% in the first quarter of 2013, from 102.4% in the first quarter of 2012.

⁵ Net entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).

Financial investment of non-financial corporations increased at an annual rate of 1.7% in the first quarter of 2013 (fourth quarter: 1.5%). The annual growth rate of currency and deposits decreased to 3.4% from 4.6%, and that of debt securities to -10.6% from -4.6%. The growth rate of loans granted decreased to 2.0% in the first quarter of 2013 from 3.3% in the fourth quarter, and that of investment in shares and other equity increased to 1.8% from 1.3%.

Insurance corporations and pension funds

The annual growth rate of **insurance technical reserves**, the major financing instrument of insurance corporations and pension funds, increased to 2.9% in the first quarter of 2013 (fourth quarter: 2.5%, see Table 6). The annual growth rate of the **financial investment** of insurance corporations and pension funds decreased to 3.3% (from 3.7%). The growth rate of investment in debt securities decreased to 3.6% (from 4.5%), while the growth of investment in shares and other equity was broadly unchanged at 4.0% (after 4.1%).

Notes

• The annual growth rate of non-financial transactions and of outstanding financial assets and liabilities (stocks) is calculated as the percentage change between the value of the transaction or outstanding amount for a given quarter and that value recorded four quarters earlier. If x_t is the value of a non-financial transaction or end-of-quarter stock, its annual percentage change $g(x_t)$ is calculated as:

$$g(x_t) = \frac{(x_t - x_{t-4})}{x_{t-4}} * 100$$

The annual growth rate used to analyse financial transactions refers to the total value of transactions during the year in relation to the outstanding stock a year before. These growth rates for financial transactions exclude the effect on the outstanding stock of revaluations, reclassifications and other changes that do not arise from transactions. If f_t represents the value of transactions in a particular financial instrument and F_t represents the value of the corresponding stock outstanding at the end of quarter t, then the annual growth rate $g(f_t)$ is calculated as the sum of the transactions during the year divided by the outstanding stock a year ago:

$$g(f_t) = \left(\sum_{i=0}^{3} f_{t-i} / F_{t-4}\right) * 100$$

- The euro area accounts encompass integrated non-financial and financial accounts, including financial balance sheets. They are jointly compiled by the ECB and the European Commission (Eurostat), in close cooperation with the national central banks and the national statistical institutes in the EU. ⁶ The European sector accounts (i.e. for the EU and the euro area) follow the methodology of the European System of Accounts 1995 (ESA 95). A detailed set of quarterly data is published in Tables 3.1-3.5, "Euro area accounts", of the statistics section of the ECB's Monthly Bulletin. Net lending for households and non-financial corporations may differ between the non-financial and the financial accounts, reflecting statistical discrepancies.
- This press release incorporates revisions for the fourth quarter of 2012 and for previous quarters.
- A comprehensive set of tables is available at http://sdw.ecb.europa.eu/reports.do?node=1000002343
 (ECB). The time series for the euro area accounts can be downloaded from the ECB's Statistical Data Warehouse.
- The publication of the data on euro area economic and financial developments in the second quarter of 2013 is scheduled to take place on Tuesday, 29 October 2013 at 10 a.m. CET.

For more details, see http://forum.europa.eu.int/irc/dsis/nfaccount/info/data/esa95/en/titelen.htm.

- 1) Households and non-profit institutions serving households.
- 2) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

- 3) Net adjustment for the change in net equity of households in pension fund reserves (receivable payable).
 4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).
 5) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.
- 6) Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.
- 7) Financial derivative's net liabilities, pension fund reserves and other accounts payable.
- 8) As a percentage of gross domestic product in the case of debt. 9) Debt is equal to loans received.

- 1) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction

- 2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

 3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

 4) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

- 5) As a percentage of gross domestic product in the case of debt.
 6) Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.
 7) Other accounts payable, financial derivative's net liabilities and deposits.
 8) Loans received, debt securities issued and pension fund reserves. Trade credits are not included as they are not available for all euro area countries

(Trade credits are estimated to be about 25% of GDP).

- 1) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

 2) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets.

 3) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the
- end-of-quarter stock value four quarters earlier.
- 4) In line with existing conventions, the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension fund reserves and other accounts payable, and the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

 5) Other accounts receivable, financial derivatives and prepayments of insurance premiums and reserves for outstanding claims.

 6) Other accounts payable, pension fund reserves, financial derivatives and unquoted shares and other equity.

- 7) General government debt at nominal value and consolidated between sub-sectors of general government.

¹⁾ Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

4) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the

end-of-quarter stock value four quarters earlier.

5) Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

6) Other accounts payable and financial derivative's net liabilities.

¹⁾ Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the

 ¹⁾ Annual growtn rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.
 2) Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.
 3) Other accounts payable and financial derivative's net liabilities.
 4) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.
