

6 May 2008

PRESS RELEASE EURO AREA ECONOMIC AND FINANCIAL DEVELOPMENTS BY INSTITUTIONAL SECTOR: FOURTH QUARTER 2007

In the fourth quarter of 2007, the annual growth rate of **net disposable income in the <u>euro</u>** <u>area</u> equalled 4.8%, compared with 5.3% in the third quarter of 2007 (see Annex Table 1). The annual growth rate of **consumption** was 3.7% in the fourth quarter, which was higher than in the third quarter (3.4%). In the fourth quarter the annual growth rate of **net saving** declined to 15.3%, from 26.8% in the previous quarter. The annual growth rate of **gross fixed capital formation** was 5.6% in the fourth quarter of 2007, compared with 6.4% in the previous quarter.

The annual growth rate of **households' gross disposable income** equalled 3.9% in the fourth quarter of 2007, compared with 3.3% in the previous quarter (see Table 2). The annual growth rate of **gross saving** of households increased to 5.3%, after equalling 2.9% previously. The households' gross saving rate² increased to 14.0%, from 13.7% in the fourth quarter of 2006. The annual growth rate of **financing** of households decreased to 5.9% in the fourth quarter, from 7.2% in the previous quarter, and the annual growth rate of their **financial investment** decreased to 3.2% in the fourth quarter, from 3.6% previously.

The annual growth rate of **gross fixed capital formation of <u>non-financial corporations</u>** in the euro area amounted to 7.8% in the fourth quarter of 2007, compared with 7.4% in the previous quarter (see Table 3). The annual growth rate of **financing** of non-financial corporations decreased to 4.8% in the fourth quarter, from 5.0% previously, and the annual growth rate of their **financial investment** decreased to 5.9% in the fourth quarter, from 6.3% previously.

Euro area

In the fourth quarter of 2007, the annual growth rate of euro area **net disposable income** decreased to 4.8%, from 5.3% in the previous quarter. The growth of euro area disposable income continued to accrue mainly to households and the government (see Chart I). The annual growth rate of euro area **net saving** declined to 15.3%, following very high growth

¹ The euro area accounts are expressed in current prices and they are not seasonally adjusted. The (nominal) growth rates are presented as year-on-year changes (see the notes).

² The households' saving rate is based on four-quarter cumulated sums of both their saving and their disposable income.

rates in the previous quarters. While the savings of households and non-financial corporations grew strongly, the contributions of the government and financial corporations to the overall saving growth moderated. The decrease in the annual growth of **gross fixed capital formation** (5.6%), compared to the previous quarter (6.4%), was mainly due to lower investment growth by households and a decrease in investment by financial corporations, whereas the investment of non-financial corporations and of government continued to grow strongly (see Chart 2). The growth rate of **total gross capital formation** increased in the fourth quarter (to 7.3%, from 6.7%) due to a smaller decrease in inventories than in the fourth quarter of last year (see Chart 3).

Households

The annual growth rate of households' **gross disposable income** increased to 3.9% in the fourth quarter of 2007, from 3.3% in the previous quarter (see Chart 4). This acceleration was mainly driven by a higher annual growth rate of the **compensation of employees**, which equalled 4.4%, after 4.0% previously (see Table 2).

The annual growth rate of households' **consumption expenditure** (3.6%) was below that of their disposable income and thus the four-quarter average households' gross saving rate increased, to 14.0%, compared with 13.7% in the fourth quarter of 2006. The growth rate of their **non-financial investment** decreased to 3.4%, from 4.2% previously (see Chart 5).

The annual growth rate of **financing** of households via the incurrence of loans decreased to 6.8% in the fourth quarter from 7.3% in the previous quarter. This coincided with a decline in the annual growth of their **financial investment** to 3.2%, from 3.6%.

Turning to the components of **households' financial investment**, the annual growth rate of their holdings of currency and deposits remained unchanged at 5.6%. The annual growth rate of their investment in debt securities increased to 2.7%, from 2.4% previously. Their investment in shares and other equity decreased by 0.4%, after having grown by 0.2% previously. Specifically, whereas the annual growth rate of households' investment in unquoted shares and other equity remained broadly unchanged, the annual growth rates of their investment in quoted shares and mutual fund shares, which were already negative in the previous quarter, became more negative. The annual growth rate of their additions to life insurance and pension fund reserves decreased to 5.4%, from 5.8% in the previous quarter.

Finally, the annual growth rate of households' **net financial wealth** decreased to 1.0%, from 3.8% in the previous quarter; mainly because of negative holding gains on their shares and other equity (see Chart 6).

Non-financial corporations

The **net entrepreneurial income** of non-financial corporations³ grew at an annual rate of 5.8% in the fourth quarter of 2007, after 7.2% in the previous quarter (see Table 3). This deceleration was partly due to the stronger growth of compensation of employees payable by non-financial corporations. The annual growth rate of their net value added decreased to 4.5%, after 5.2% previously (see Chart 7 and Table 3).

The annual growth rate of **gross fixed capital formation** of non-financial corporations increased to 7.8% in the fourth quarter of 2007, after 7.4% in the previous quarter (see Chart 8). The increase in the annual growth rate of total gross non-financial investment was more pronounced (to 11.1%, after 7.4%) as the typical run-down of inventories in the fourth quarter was less strong than in the fourth quarter of 2006. The increase in non-financial investment was only partly financed internally, by increased saving ("retained earnings"), and thus the net borrowing of non-financial corporations increased as well.

In the fourth quarter of 2007, the annual growth rate of **financing** by non-financial corporations decreased to 4.8%, from 5.0% previously. The growth rate of their loan financing remained broadly stable at 11.3%, while the annual growth rate of their issuance of debt securities increased to 7.2%, from 5.4%. The annual growth rate of their equity financing, via the issuance of shares and other equity, decreased to 1.9%, from 2.3% (see Table 3).

As regards the **financial investment** of non-financial corporations, the annual growth rate of their investment in currency and deposits decreased to 9.3%, from 11.9% previously. The growth rate of their investment in shares and other equity increased to 3.8%, from 3.4% previously.

Insurance corporations and pension funds

The annual growth rate of **insurance technical reserves**, the major financing instrument of insurance corporations and pension funds, decreased to 6.0% in the fourth quarter of 2007, from 6.6% previously (see Table 6). The annual growth rate of the issuance of quoted shares by this sector decreased to 0.5%, from 0.9% previously. The annual growth rate of their **financial investment** declined to 5.6%, after 6.0% previously. The growth rate of their investment in debt securities remained broadly unchanged at 9.3%, while that of their investment in shares and other equity remained broadly unchanged at 3.4%.

Additional information on the euro area accounts

³ Entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).

This press release incorporates revisions for the third quarter of 2007 and for previous quarters. These revisions have not substantially altered the main aggregates that were previously published.

The euro area accounts encompass integrated non-financial and financial accounts, including financial balance sheets. These quarterly European sector accounts are jointly compiled by the ECB and the European Commission (Eurostat), in close cooperation with the national central banks and the national statistical institutes in the EU.⁴ The European sector accounts follow the methodology of the European System of Accounts 1995 (ESA 95).⁵

A detailed set of quarterly data is published in Tables 3.1 - 3.5, "Euro area accounts", of the statistics section of the ECB's Monthly Bulletin. A comprehensive set of tables is made available at http://www.ecb.eu/stats/acc/html/index.en.html (ECB). The time series for the euro area accounts can be downloaded from the ECB's Statistical Data Warehouse (SDW).

The publication of euro area economic and financial developments in the first quarter of 2008 is scheduled to take place on **I** August 2008 at 10.00 am (CEST).

Euro area non-financial corporations

Chart 7 Growth of net entrepreneurial income of non-financial corporations and contributions by component (annual percentage changes and percentage point contributions)

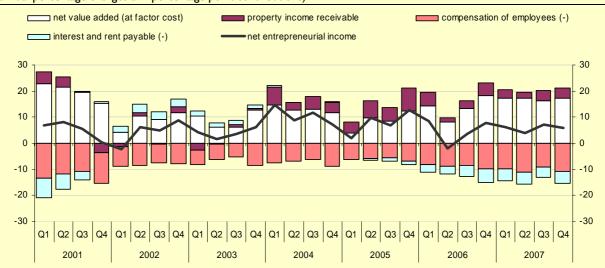

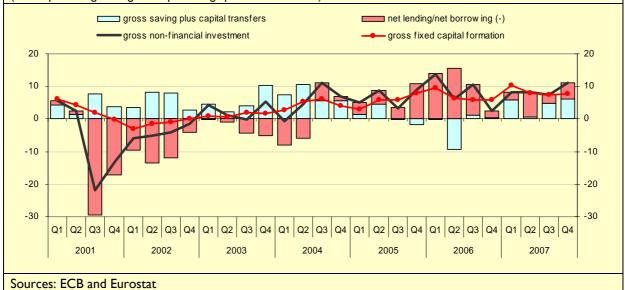

Chart 8 Growth of non-financial investment of non-financial corporations and contributions by source of internal and external financing

(annual percentage changes and percentage point contributions)

Notes

The annual growth rate of non-financial transactions and of outstanding financial
assets and liabilities (stocks) is calculated as the percentage change between the value of
the transaction or outstanding amount for a given quarter and that value recorded four quarters
earlier. Let x_t be the level of a non-financial transaction or end-of-quarter stock, then its annual
percentage change g(x_t) is calculated as:

$$g(x_t) = \frac{(x_t - x_{t-4})}{x_{t-4}} * 100.$$

• The annual growth rate used to analyse financial transactions refers to the total value of transactions during the year in relation to the outstanding stock a year before. These growth rates for financial transactions exclude the effect on the outstanding stock of revaluations, reclassifications, and further changes that do not arise from transactions. When f_t represents the value of transactions in a particular financial instrument, and F_t represents the value of the corresponding stock outstanding at the end of quarter t, then the annual growth rate $g(f_t)$ is calculated as the sum of the transactions during the year divided by the outstanding stock a year ago:

$$g(f_t) = \left(\sum_{i=0}^{3} f_{t-i} / F_{t-4}\right) * 100$$

¹⁾ Households and non-profit institutions serving households.

²⁾ Annual percentage changes are calculated as $100^*(x_t - x_{t-4})/x_{t-4}$ where x_t stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction or stock four quarters earlier.

³⁾ Net adjustment for the change in net equity of households in pension fund reserves (receivables - payables).

⁴⁾ Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

⁵⁾ Annual growth rates for financial transactions are calculated as 100*(f_t+f_{t-1}+f_{t-2}+f_{t-3})/F_{t-4} where f_t stands for the transactions in quarter t, and F_{t-4} for the end-of-quarter stock value four quarters earlier.

⁶⁾ Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

⁷⁾ Financial derivative net liabilities, pension fund reserves and other accounts payable.

¹⁾ Annual percentage changes are calculated as $100^*(x_t r_{x_{t-4}})/x_{t-4}$ where x_t stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction or stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

³⁾ Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

4) Annual growth rates for financial transactions are calculated as 100*(f₁+f₁₋₂+f₁₋₃)/F₁₋₄ where f₁ stands for the transactions in quarter t, and F₁₋₄ for the end-of-quarter stock value four quarters earlier.

⁵⁾ Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

⁶⁾ Other accounts payable, financial derivative net liabilities and deposits.

Memo: Government debt (at nominal value) 7)	5,429	5,678	5,803	5,912	5,995	5,983	5,899			I	

¹⁾ Annual percentage changes are calculated as $100^*(x_t-x_{t-4})/x_{t-4}$ where x_t stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction or stock four quarters earlier.

²⁾ Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets.

³⁾ Annual growth rates for financial transactions are calculated as $100^*(f_t + f_{t,1} + f_{t,2} + f_{t,3})/F_{t,4}$ where f_t stands for the transactions in quarter t, and $F_{t,4}$ for the end-of-quarter stock value four quarters earlier.

⁴⁾ In line with existing conventions, the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension fund reserves and other accounts payable, and the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

⁵⁾ Other accounts receivable, financial derivatives and prepayments of insurance premiums and reserves for outstanding claims.

⁶⁾ Other accounts payable, pension fund reserves, financial derivatives and unquoted shares and other equity.

⁷⁾ General government debt at nominal value and consolidated between sub-sectors of general government.

¹⁾ Annual percentage changes are calculated as $100^*(x_t-x_{t-4})/x_{t-4}$ where x_t stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction or stock four quarters earlier.

stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

³⁾ Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

⁴⁾ Annual growth rates for financial transactions are calculated as $100^*(f_t + f_{t-1} + f_{t-2} + f_{t-3})/F_{t-4}$ where f_t stands for the transactions in quarter t, and F_{t-4} for the end-of-quarter stock value four quarters earlier.

⁵⁾ Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

⁶⁾ Other accounts payable and financial derivative net liabilities.

1) Annual growth rates for financial transactions are calculated as $100^{\circ}(f_{t}+f_{t-1}+f_{t-2}+f_{t-3})/F_{t-4}$ where f_{t} stands for the transactions in quarter t, and F_{t-4} for the endof-quarter stock value four quarters earlier.

²⁾ Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

3) Other accounts payable and financial derivative net liabilities.

4) Annual percentage changes are calculated as 100*(x_t-x_{t-4})/x_{t-4} where xt stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction or stock four quarters earlier.
